

Declaration of Academic Integrity

I hereby declare that I have written this seminar paper, bachelor's or master's thesis with the topic:

“.....”

independently and have not used any resources other than those specified. I am aware of the [rules of good scientific practice](#)¹ and have observed them (in particular part A, paragraph 1, part B, paragraph 6, section 4). I have therefore identified passages taken from other works in terms of wording or meaning by citing the source in each individual case, including the secondary literature or AI tools used. Where text passages have been taken directly, I have indicated the page numbers of the source, if available. I have indicated AI-generated content as a citation in the text.²

I am aware that when using content from the Internet, I have marked it and indicated the link and the date of access.

If AI tools were not used to generate content, but e.g. for linguistic review and improvement of texts, translation, systematic research, creation of outlines or for literature searches, I have given the product name and the type of use in a separate section following the bibliography. I am fully responsible for the selection, adoption and all results of the AI-generated output used by me and, in the case of the adoption of scientific content, I have checked it for correctness in the original sources, as the adoption of factually incorrect AI-generated content is considered an attempt to deceive, which can lead to failing the examination.

I am aware that texts are assessed as unsatisfactory if they consist to a considerable extent of the compilation of AI-generated text passages. Examiners may request a reflection paper on the use of AI. If the assessors have doubts about the correctness of the information provided on the use of AI tools or the appropriateness of this use, they may conduct an additional oral examination on the topic of the written work.

I confirm that the paper has not been submitted to any other examination authority or has already been submitted.

Place, date

² You can find help on citing generative AI content at <https://style.mla.org/citing-generative-ai/>, for example. To ensure maximum transparency, we recommend documenting prompts, chat histories and the use of text passages from the chat histories for personal documentation (e.g. using PDF copies or screenshots of the chat histories). Please note that neither copyrighted material nor data protection sensitive information of third parties (e.g. test persons) may be transferred to the software.

Please note

- Seminar papers must be submitted digitally or in one printed version.
- Bachelor's and Master's theses must be submitted on time in two bound copies and one upload in the Moodle course "Einreichen der Abschlussarbeit - Kulturwissenschaftliche Fakultät" at the Examinations Office. The time of receipt counts.*
- If the Bachelor's and Master's thesis is written in German, the thesis must contain a summary in English. If the Bachelor's and Master's thesis is written in English, the thesis must contain a summary in German.

* If the Examinations Office is not available, the thesis can be handed in at the Service Point during normal office hours. The thesis can also be placed in the mailbox of the Examinations Office in the waiting area of the Department of Student Affairs.
