Project „Environment and Digitization“

Call „Utopia Europa – Digital Utopia“

EUROPA-UNIVERSITÄT VIADRINA FRANKFURT (ODER)

EUROPA-UNIVERSITÄT
VIADRINA
FRANKFURT (ODER)

Project Environment and Digitization

Coordinated in the framework of the **Strategic Partnership** between Paris 1, the University Viadrina and the CMB (programme „Pensées françaises contemporaines“)

Financed by:

Main question:

Are new
technologies
going to harm

or to save our
environment?

Discussing topics in an interactive format:

- 1) The use of digital technology to support climate protection and adaptation: new technologies serving the environment and mankind?
- 2) Crisis management: To what extent can new technologies help to overcome crises?
- 3) Technology, energy and natural resources: what do new technologies consume?
- 4) For a responsible and reflected use of new technologies in view of climate problems: What about the concept of „digital sobriety“?

5 project phases

1

Nov.-Dec. 2020:

Thematic sessions with lecturers and students EUV/Paris 1/CMB

2

Dec. 2020:

Students' discussion Forum: preparation of discussion panels

3

Jan.-Feb. 2020:

2 discussion panels with academics, experts, representatives of EU Parliaments, EU Commission, and French Embassy

4

March 2021:

Preparation of a position paper
Presentation during a competition at the French Embassy

5

Beyond March 2021:

Diffusion of project results to the larger public

Now: Phase 1

Several seminars and lectures' sessions related to the project's topic open to students from Paris 1, Viadrina and Centre Marc Bloch
